Afrofuturism gains new momentum as artists reclaim black history *A Swift Death and Steady Resurrection: Salvage Anthropology and U.S. Museums Bone Rooms From Scientific Racism*

Bone Rooms covers the history of physical anthropology in relation to science professionals collecting bone specimens for museum collections in the late 19th century and early 20th century. In that regard, it was very informative. Otherwise, I found the book a bit repetitive with its focus on Hrdlicka's racial hierarchy focus in the Smithsonian.

Cobb's remarkable life and academic work is a compelling part of Bone Rooms, but the complexity of his perspective would emerge only if it were situated as part of the long nineteenth-century project of antislavery and emancipation. Doing so would highlight the creativity of Cobb's history of the origins of race-based physical anthropology, a history of slavery that, like his academic analysis of racial similarity, pushed back against one of the consequences of abolition—the replacement of ...
