GEVO engine specs!

All are powered by the GE GEVO engine. The Evolution Series was named as one of the "10 Locomotives That Changed Railroadng" in the January 2009 issue of Trains Magazine. It was the only locomotive introduced after 1972 to be included in that list. The Evolution Series, mainly the ES44DC, ES44AC, and ET44AC, are some of the best-selling and ...

GE Evolution Series - Wikipedia

See if you can dig up a Gannon University paper presented by GE about the GEVO engine. I don't have the article anymore, but have read it. The reason for the increased cylinder offset on the GEVO is because the rod bearings are wider than the V-16; 14mm if I remember correctly. Four bolts are used on each rod cap instead of two.

These Evolution Series locomotives are equipped with AC traction motors and are powered by a newly designed "GEVO-12" 12 cylinder engine that produces the same power as the 16 cylinder AC4400CW, but with fewer emissions and greater fuel economy. It also carries a redesigned air-to-air dual-fan heat exchanger, which gives it its distinct ...

N-Scale GE ES44 "GEVO": Precision Railroad Models

GE Evolution 12cyl "Gevo" Locomotives have a 4 stroke diesel engine and have been designed to be more efficient and more emission friendly than previous models. Evolution Series locomotives are equipped with either AC or DC traction motors, depending on the customer's preference, though admittedly there is little sound difference if any between the two.
