The seven steps in job costing are (1)  
identify the job that is the chosen cost  
object, (2) identify the direct costs of  
the job, (3) select the cost-allocation  
bases to use for allocating indirect  
costs to the job, (4) identify the indirect  
costs associated with each cost-  
allocation base, (5) compute the rate  
per unit of each cost-allocation base  
used to allocate indirect costs to the

4-10 Explain how job-costing information may be used for decision making. Job-costing information can be used to determine the profitability of individual jobs, to assist with determining the minimum price for a job in bidding situation, and to help in prioritizing jobs based on the costs and profits when there are limited resources.

## Chapter 4

4-4. In a process costing system, the activity performed in a department must be performed uniformly on all units moving through it and the output of the department must be homogeneous. 4-5. Cost accumulation is simpler under process costing because costs only need to be assigned to departments—not separate jobs.

3-1 By definition, manufacturing  
overhead consists of costs that cannot  
be practically traced to jobs.

Therefore, if these costs are to be  
assigned to jobs, they must be  
allocated rather than traced. 3-2 The  
first step is to estimate the total  
amount
