You can give users access to Unity Assistant and etc. via the CoS configurations. If you truly mean CCMUser which is for the phone, then the end users need to be a member of the Standard End Users group (name may be off a bit but it's pretty obvious when you look at it) to access this page for administration of their phone. Hailey

End User Creation. When a new end user is created, we've already talked about the fact that we can use a template to allow that new end user to inherit several pre-configured parameters, but there are some things that need to be unique to that user. For example, they need to have their own first and last name, they need a unique user id, we need to define an extension for that user and if we have more than one Cisco Unity Connection server, we need to specify where is the mailbox store going ...
