This textbook is a comprehensive guide for students interested in using participatory research to improve people's health and well-being. It is especially designed for those working in the fields of health and social welfare who are embarking on participatory research for the first time. It covers all phases in participatory research from "getting started," to "acting for change," "continuing the journey" and "articulating impact." Its unique format helps readers understand the essence of participatory research as a comprehensive approach for doing research which is underpinned by a set of fundamental values. The many real life examples of participatory research projects from around the world inspire readers to find creative ways to manage their own research while opening up new horizons in their work.

The "Age-Friendly Cities & Communities: States of the Art and Future Perspectives" publication presents contemporary, innovative, and insightful narratives, debates, and frameworks based on an international collection of papers from scholars spanning the fields of gerontology, social sciences, architecture, computer science, and gerontechnology. This extensive collection of papers aims to move the narrative and debates forward in this interdisciplinary field of age-friendly cities and communities.

The leading text that covers both the theory and practice of evaluation in one engaging volume has now been revised and updated with additional evaluation approaches (such as mixed methods and principles-focused evaluation) and new methods (such as technologically based strategies). The book features examples of small- and large-scale evaluations from a range of fields, many with reflective commentary from the evaluators; helpful checklists; and carefully crafted learning activities. Major theoretical paradigms in evaluation--and the ways they inform methodological choices--are explained. Readers learn effective strategies for clarifying their own theoretical assumptions; working with stakeholders; developing questions; using quantitative, qualitative, and mixed methods designs; selecting data collection and sampling strategies; analyzing data; and communicating and utilizing findings. The new companion website provides extensive recommended online resources and tools, organized by chapter. New to This Edition *Additional evaluation approaches: collaborative evaluation, principles-focused evaluation, and desk reviews. *Coverage of new data collection technologies and methods of qualitative coding. *Expanded discussions of logic models, cost-benefit analysis, and mixed methods designs. *Many new and updated sample studies. Pedagogical Features *Reflection questions that prepare students to read each chapter. *"Extending Your Thinking" questions and practical activities. *Boxes delving into key concepts and example studies. *End-of-book Glossary, and highlighted key terms throughout. *Companion website with links to helpful resources on all aspects of evaluation.

"Bridges community practice and clinical practice by collecting 33 chapters from social workers, psychologists, and psychiatrists that outline and illustrate the state of the art. Designed specifically for clinicians making the transition to community-based work"--Provided by publisher.

This groundbreaking resource explores core issues in participatory health research (PHR) and traces its global emergence as a force for improving health and well-being, healthcare services, and quality of life. The PHR approach is defined as including community members, health practitioners, and decision-makers as co-researchers, using local knowledge to reduce disparities in care, advocate for responsive health policy, and accelerate positive change in society as a whole. The book's first half surveys themes essential to the development of the field, including evaluating PHR projects, training professionals in conducting PHR, and the ambitious work of the International Collaboration for Participatory Health Research. International perspectives showcase the varied roles of PHR in addressing urgent local health problems in their specific public health and sociocultural contexts. Among the topics covered: Demonstrating impact in participatory health research Reviewing the effectiveness of participatory health research: challenges and possible solutions Kids in Action--participatory health research with children Participatory health research: an Indian perspective Participatory health research in Latin America: scientific production on chronic diseases Participatory health research in North America: from community engagement to evidence-informed practice Participatory Health Research benefits those teaching and learning about participatory health research at institutions of higher education and in community settings, addressing diverse fields including health promotion and disease prevention, medicine and public health, quality of life, social work, and community development.

Now in its fourth edition, this handbook is an essential resource for those interested in all aspects of qualitative research, and has been extensively revised and updated to cover new topics including applied ethnography, queer theory and auto-ethnography.
