Sorting out the scientific facts from the unsupported hype about emotional intelligence. Emotional intelligence (or EI)—the ability to perceive, regulate, and communicate emotions, to understand emotions in ourselves and others—has been the subject of best-selling books, magazine cover stories, and countless media mentions. It has been touted as a solution for problems ranging from relationship issues to the inadequacies of local schools. But the media hype has far outpaced the scientific research on emotional intelligence. In What We Know about Emotional Intelligence, three experts who are actively involved in research into EI offer a state-of-the-art account of EI in theory and practice. They tell us what we know about EI based not on anecdote or wishful thinking but on science. What We Know about Emotional Intelligence looks at current knowledge about EI with the goal of translating it into practical recommendations in work, school, social, and psychological contexts.

Since the release of the very successful first edition in 2001, the field of emotional intelligence has grown in sophistication and importance. Many new and talented researchers have come into the field and techniques in EI measurement have dramatically increased so that we now know much more about the distinctiveness and utility of the different EI measures. There has also been a dramatic upswing in research that looks at how to teach EI in schools, organizations, and families. In this second edition, leaders in the field present the most up-to-date research on the assessment and use of the emotional intelligence construct. Importantly, this edition expands on the previous by providing greater coverage of emotional intelligence interventions. As with the first edition, this second edition is both scientifically rigorous, yet highly readable and accessible to a non-specialist audience. It will therefore be of value to researchers and practitioners in many disciplines beyond social psychology, including areas of basic research, cognition and emotion, organizational selection, organizational training, education, clinical psychology, and development psychology.
