UK & World News. News. People struggling to buy food and medicine as shops refuse cash. Many shops are only taking card payments due to the pandemic, but some people have been unable to buy basics.

Presents a season-by-season guide to the identification, harvest, and preparation of more than two hundred common edible plants to be found in the wild.

Ethnologist with the Smithsonian Institution offers a wealth of material on nearly 200 plants used by Chippewas of Minnesota and Wisconsin. Emphasis on wild plants and lesser-known uses. 33 plates.

"In this wide-ranging book, Nina Etkin reveals the medicinal properties of foods in the specific cultural contexts in which they are used. Incorporating co-evolution with a biocultural perspective, she addresses some of the physiological effects of foods across cultures and through history while taking into account both the complex dynamics of food choice and the blurred distinctions between food and medicine. Showing that food choice is more closely linked to health than is commonly thought, she helps us to understand the health implications of people's food-centered actions in the context of real-life circumstances."--Jacket.

Originally published: Practical guide to edible and useful plants. Austin, Tex.: Texas Monthly Press, c1987.

So that we will become intimately acquainted with edible and medicinal plants.

Offers information on the healing effects of a variety of food.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

For over fifteen years I have experimented and explored the world of wild plants. Uncovering how our ancestors used plants to nourish and heal themselves. I've spent thousands of hours digging through scientific papers, read hundreds of books. Even gone so far as to be nomadic for over a year. During this time I followed the seasons and plants around the highways and byways of these isles. I have written this book to help you rediscover our forgotten plant heritage. To learn how to use wild plants as food and medicine. Knowledge that was once common to everyone. A NOTE ON PHOTOS Most wild flower books only provide one photo of each plant for identification. Then a little bit of botanical description. Usually using words that don't mean anything to anybody, unless you are a botany geek. To forage plants safely, you need a specialist plant identification book. Which is why in this book there are no pictures, nor a botanical profile. NICE THINGS PEOPLE HAVE PREVIOUSLY SAID Robin's infectious encyclopaedic enthusiasm is borne from complete commitment to his chosen field. - Michael Kuzz You transported us to a whole new level of awareness of not only the plants we get to see, smell and taste, but also the relationship that is possible with our natural environment that most of us have lost over just a single generation. - Richard & Debbie Stanfield My love of the plants and my interaction with them was given a massive boost by your knowledge. - Pip Martin ABOUT THE AUTHOR Robin Harford is a plant-based forager, ethnobotanical researcher and wild food educator. He has published over 50 foraging guide books. He established his wild food foraging school in 2008, and his foraging courses were recently voted #1 in the country by BBC Countryfile. Robin is the creator of eatweeds.co.uk, which is listed in The Times Top 50 websites for food and drink. He has travelled extensively documenting and recording the traditional and local uses of wild food plants in indigenous cultures, and his work has taken him to Africa, India, SE Asia, Europe and the USA. Robin regularly appears on national and local radio and television. He has been recommended in BBC Good Food magazine, Sainsbury's magazine as well as in The Guardian, The Times, The Independent, The Daily Telegraph etc.
