Industrial Organization | NBER

In economics, industrial organization is a field that builds on the theory of the firm by examining the structure of firms and markets. Industrial organization adds real-world complications to the perfectly competitive model, complications such as transaction costs, limited information, and barriers to entry of new firms that may be associated with imperfect competition. It analyzes determinants of firm and market organization and behavior on a continuum between competition and monopoly, includi

Industrial organization - Wikipedia

Since engineering is an important part of the manufacturing sector of the economy, engineering industrial economics is an important part of industrial or business economics. Major topics in engineering industrial economics are: The economics of the management, operation, and growth and profitability of engineering firms; Macro-level engineering economic trends and issues; Engineering product markets and demand influences; and; The development, marketing, and financing of new engineering ...
