Developments in information and communication technology and networked computing over the past two decades have given rise to the notion of electronic government, most commonly used to refer to the delivery of public services over the Internet. This volume argues for a shift from the narrow focus of “electronic government” on technology and transactions to the broader perspective of information government—the information flows within the public sector, between the public sector and citizens, and among citizens—as a way to understand the changing nature of governing and governance in an information society. Contributors discuss the interplay between recent technological developments and evolving information flows, and the implications of different information flows for efficiency, political mobilization, and democratic accountability. The chapters are accompanied by short case studies from around the world, which cover such topics as electronic government efforts in Singapore and Switzerland, the U.S. Environmental Protection Agency's effort to solicit input on planned regulations over the Internet, and online activism “cyberprotesting” globalization. Contributors: Robert D. Behn, Maria Christina Binz-Scharf, Herbert Burkert, Lorenzo Cantoni, Cary Coglianese, Martin J. Eppler, Jane E. Fountain, Monique Girard, Ake Gronlund, Matthew Hindman, Edwin Lau, David Lazer, Viktor Mayer-Schonberger, Ines Mergel, Gopal Raman, David Stark, Sandor Vegh, and Darrell M. West
