Online Library Information

Coding theory is the study of the properties of codes and their respective fitness for specific applications. Codes are used for data compression, cryptography, error detection and correction, data transmission and data storage.

Online Library Information

Codes are studied by various scientific disciplines—such as information theory, electrical engineering, mathematics, linguistics, and computer science—for the purpose of designing efficient and reliable data

Cyclic codes. CC is a kind of linearly group code rel. to systematic code. It is convenient to set the cyclic binary code vector in the form of a

polynomial (and not a combination of 0.1). $F(x) = a_{n-1}x^{n-1} (+) a_{n-2}x^{n-2} (+) \dots$
