Ishi's Brain is a first-person account by anthropologist Orin Starn, who sought to unravel the mystery of Ishi's true nature and. Captured in the hills of northern California in 1911, Ishi, the last stone-age Indian in North America, was brought to San Francisco by the famous anthropologist Alfred Kroeber, and became a living museum display until his death five years later.

ISHI'S BRAIN is no politically correct screed. It reflects a conscientious effort, difficult as it may be, to be historically objective and accurate. It also reflects admirable sensitivity to and understanding of the circumstances impinging on the lives and actions of the various people Starn encountered in following the story of Ishi's brain.

The result is his version of the story, *Ishi's Brain: In Search of America's Last 'Wild' Indian* (W.W. Norton & Company). Starn will talk about the book Sunday, Sept. 26, at 5 p.m. on UNC-TV's literary series North Carolina Bookwatch with host D.G. Martin. Early in his research, Starn stumbled upon a mystery: What had happened to Ishi's brain?

Ishi's Brain: In Search of the Last "Wild" Indian: Starn ...

Orin Starn is an anthropologist and writer at Duke University. Starn is the author of *Ishi's Brain: In Search of America's Last Wild Indian* and co-author of *The Shining Path: Love, Madness, and Revolution in the Andes* with Miguel La Serna; his other books include *The Passion of Tiger Woods: An Anthropologist Reports on Golf, Race, and Celebrity Scandal*, *Nightwatch: The Politics of Protest in the Andes*, and he is co-editor of *The Peru Reader, Between Resistance and Revolution, and Indigenous Expe*

From the mountains of California to a forgotten steel vat at the Smithsonian, this "eloquent and soul-searching book" (Lit) is "a compelling account of one of American anthropology's strangest, saddest chapters" (Archaeology). After the Yahi were massacred in the mid-nineteenth century, Ishi survived alone for decades in the mountains of northern California, wearing skins and hunting with bow and arrow. His capture in 1911 made him a national sensation; anthropologist Alfred Kroeber declared him the world's most "uncivilized" man and made Ishi a living exhibit in his museum. Thousands came to see the displaced Indian before his death, of tuberculosis. *Ishi's Brain* follows Orin Starn's gripping quest for the remains of the last of the Yahi.

Originally published: 1961. With new foreword.

When Ishi, "the last wild Indian," came out of hiding in August 1911, he was quickly whisked away by train to San Francisco to meet Alfred Kroeber, one of the fathers of American anthropology. When Kroeber and Ishi came

face to face, it was a momentous event, not only for each man but also for the cultures they represented. Each stood on the brink--one was in danger of losing something vital while the other was in danger of disappearing altogether. Ishi was a survivor, and he viewed the bright lights of the big city with a mixture of awe and bemusement. What surprised everyone is how handily he adapted himself to the modern city while maintaining his sense of self and his culture. Kroeber was professionally trained to document Ishi's culture and his civilization. What he didn't count on was how deeply working with the man would lead him to question his own profession and his civilization--how it would rekindle a wildness of his own. Although Ishi's story has been told before in film and fiction, *Wild Men* is the first book to focus on the depth of Ishi and Kroeber's friendship. Exploring what their intertwined stories tell us about Indian survival in modern America and about America's fascination with the wild, this text is an ideal supplement for courses on Native American history, the U.S. West, and the history of California.

Collects documents and information on Ishi, the last member of the Yahi.

This book examines the career of Tiger Woods, from child star to global sports celebrity. Starn shows that while the scandal following the revelation of Tiger's infidelities was like many similar media-generated scandals of recent years, by examining the way Woods was seen afterwards, we can learn a lot about race and sex in contemporary America.

A narrative history of the unlikely Maoist rebellion that terrorized Peru even after the fall of global Communism. On May 17, 1980, on the eve of Peru's presidential election, five masked men stormed a small town in the Andean heartland. They set election ballots ablaze and vanished into the night, but not before planting a red hammer-and-sickle banner in the town square. The lone man arrested the next morning later swore allegiance to a group called Shining Path. The tale of how this ferocious group of guerrilla insurgents launched a decade-long reign of terror, and how brave police investigators and journalists brought it to justice, may be the most compelling chapter in modern Latin American history, but the full story has never been told. Described by a U.S. State Department cable as "cold-blooded and bestial," Shining Path orchestrated bombings, assassinations, and massacres across the cities, countryside, and jungles of Peru in a murderous campaign to seize power and impose a Communist government. At its helm was the professor-turned-revolutionary Abimael Guzmán, who launched his single-minded insurrection alongside two women: his charismatic young wife, Augusta La Torre, and the formidable Elena Iparraguirre, who married Guzmán soon after Augusta's mysterious death. Their fanatical devotion to an outmoded and dogmatic ideology, and the military's bloody response, led to the death of nearly 70,000 Peruvians. Orin Starn and Miguel La Serna's narrative history of Shining Path is both panoramic and intimate, set against the socioeconomic upheavals of Peru's rocky transition from military dictatorship to elected democracy. They take readers deep into the heart of the rebellion, and the lives and country it nearly destroyed. We hear the voices of the mountain villagers who organized a fierce rural resistance, and meet the irrepressible black activist María Elena Moyano and the Nobel Prize-winning novelist Mario Vargas Llosa, who each fought to end the bloodshed. Deftly written, *The Shining Path* is an exquisitely detailed account of a little-remembered war that must never be forgotten.

Rereading *Ishi's Story* offers a manifesto of sorts through a critical reading of an anthropological classic, Theodora Kroeber's 1961 book, *Ishi in Two Worlds: A Biography of the Last Wild Indian in North America*. The heart of the analysis involves a five-play cycle, built around Gerald Vizenor's trickster-survival model. It gives Ishi a voice he never had in Kroeber's book and imagines an Ishi who was not the happy warrior in Kroeber's book. The author follows the story line in Kroeber's book, focusing on key events as recounted by Alfred Kroeber and his associates Saxton Pope and Thomas Waterman. Chapter 1 tells Ishi's story in his own words; Chapter 2 retells Ishi's capture narrative, which includes the recording of his story of the wood ducks; Chapter 3 builds on stories told about Ishi by Zumwalt Jr.; Chapter 4 criticizes Kroeber and associates for making Ishi return to his homeland, asking him to "play" Indian; and Chapter 5 takes up his death and the recovery of his brain. The concluding chapters address repatriation practices, genocide, Indigenous ethics, discourses of forgiveness, and a performance autoethnography ethic for this new century, returning to the Kroebers and their autoethnographic practices. This book continues a four-volume project on Native Americans, the postmodern Wild West shows, museums, violence, genocide, and the modern U.S. American use of the Native American in a collective search for an authentic identity (Denzin, 2015, 2013, 2011, 2008). It will be of great interest to scholars and students of qualitative inquiry, anthropology, and Native American studies.

For Native peoples of California, the abalone found along the state's coast have remarkably complex significance as food, spirit, narrative symbol, tradable commodity, and material with which to make adornment and sacred regalia. The large mollusks also represent contemporary struggles surrounding cultural identity and political sovereignty. *Abalone Tales*, a collaborative ethnography, presents different perspectives on the multifaceted material and symbolic relationships between abalone and the Ohlone, Pomo, Karuk, Hupa, and Wiyot peoples of California. The research agenda, analyses, and writing strategies were determined through collaborative relationships between the anthropologist Les W. Field and Native individuals and communities. Several of these individuals contributed written texts or oral stories for inclusion in the book. Tales about abalone and their historical and contemporary meanings are related by Field and his coauthors, who include the chair and other members of the Muwekma Ohlone Tribe; a Point Arena Pomo elder; the chair of the Wiyot tribe and her sister; several Hupa Indians; and a Karuk scholar, artist, and performer. Reflecting the divergent perspectives of various Native groups and people, the stories and analyses belie any presumption of a single, unified indigenous understanding of abalone. At the same time, they shed light on abalone's role in cultural revitalization, struggles over territory, tribal appeals for federal recognition, and connections among California's Native groups. While California's abalone are in danger of extinction, their symbolic power appears to surpass even the environmental crises affecting the state's vulnerable coastline.

A young Yahi Indian and his tribe struggle to save themselves and their culture from destruction by the white man

In *Territories of Difference*, Arturo Escobar, author of the widely debated book *Encountering Development*, analyzes the politics of difference enacted by specific place-based ethnic and environmental movements in the context of neoliberal globalization. His analysis is based on his many years of engagement with a group of Afro-Colombian activists of Colombia's Pacific rainforest region, the *Proceso de Comunidades Negras* (PCN). Escobar offers a detailed ethnographic account of PCN's visions, strategies, and practices, and he chronicles and analyzes the movement's struggles for autonomy, territory, justice, and cultural recognition. Yet he also does much more. Consistently emphasizing the value of local activist knowledge for both understanding and social action and drawing on multiple strands of critical scholarship, Escobar proposes new ways for scholars and activists to examine and apprehend the momentous, complex processes engulfing regions such as the Colombian Pacific today. Escobar illuminates many interrelated dynamics, including the Colombian government's policies of development and pluralism that created conditions for the emergence of black and indigenous social movements and those movements' efforts to steer the region in particular directions. He examines attempts by capitalists to appropriate the rainforest and extract resources, by developers to set the region on the path of modernist progress, and by biologists and others to defend this incredibly rich biodiversity "hot-spot" from the most predatory activities of capitalists

and developers. He also looks at the attempts of academics, activists, and intellectuals to understand all of these complicated processes. Territories of Difference is Escobar's effort to think with Afro-Colombian intellectual-activists who aim to move beyond the limits of Eurocentric paradigms as they confront the ravages of neoliberal globalization and seek to defend their place-based cultures and territories.
