students of humanities, cultural history, and history of the arts to understand and appreciate the relevance of historical works and ideas to their own daily lives. In chronological sequence, Landmarks guides students on a journey of the most notable monuments of the human imagination and the most prominent ideas and issues that have shaped the course and character of the world's cultures from prehistory to the present. The landmarks that mark this journey are the great works of their place and time and, in some cases, of all time. The text reflects the author's extensive background in

the study of Humanities, which has enabled her to craft a narrative that is at once brief and comprehensive, giving students a thorough understanding of the interrelatedness of various modes of expression—art and architecture, literature, philosophy, and music--without overwhelming them with detail. Each of the text's fifteen chapters is centered on a key idea related to the period being discussed, and contains a series of valuable pedagogical features including timelines, high-quality maps, and boxed material. Each chapter also takes a unique cultural or historical point of view,

often through primary sources, the stylistic relationship between two or more images and ideas or between text and image, and contemporaneous non-Western cultural landmarks and cross-cultural influences. In this edition, each chapter opens with “A First Look” at a landmark work that illustrates the key idea of the chapter and acts as a cultural guidepost to that chapter’s overarching theme. This new feature explains the artwork’s significance as a landmark in its own time as well as in ours.

since the publication of the original book, *Racial Formation in the United States* now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant, but the overall purpose and vision of this classic remains the same: Omi and Winant provide an account of how concepts of race are created and transformed, how they become the focus of political conflict, and how they come to shape and permeate both identities and institutions. The steady journey of the U.S. toward a majority nonwhite population, the ongoing evisceration of the political legacy of the early post-

clinical information for busy practicing radiation oncologists. The book consists of 26 chapters, divided into four parts: Part I describes the basic science of radiation oncology, with discussions of radiation physics, radiation protection, and radiation biology, as well as molecular biology. Part II describes techniques and modalities of radiation oncology including brachytherapy, intensity-modulated radiation therapy (IMRT), stereotactic radiotherapy (SRS), stereotactic body radiation therapy (SBRT), and proton therapy. Significant recent advances made in the areas of immunotherapy and combined

This book examines the terrorist networks that operate globally and analyses the long-term future of terrorism and terrorist-backed insurgencies. Terrorism remains a serious problem for the international community. The global picture does not indicate that the 'war on terror', which President George W. Bush declared in the wake of the 9/11

attacks, has been won. On the other hand it would be incorrect to assume that Al Qaeda, its affiliates and other jihadi groups have won their so-called 'holy war' against the Coalition against Terrorism formed after 9/11. This new edition gives more attention to the political and strategic impact of modern transnational terrorism, the need for maximum international cooperation by law-abiding states to counter not only direct threats to the safety and security of their own citizens but also to preserve international peace and security through strengthening counter-proliferation and
