An introduction to research methods. Research methods are specific procedures for collecting and analyzing data. Developing your research methods is an integral part of your research design. When planning your methods, there are two key decisions you will make. First, decide how you will collect data. Your methods depend on what type of data you need to answer your research question:

The research design is at the very heart of scientific methodology; it can be used to answer practical questions or to test theoretical propositions/hypotheses. The three designs most often used in organizational behavior research today are. Experiment. Case. Survey. All three have played important roles in the development of meaningful knowledge.

Organizational behavior (OB) or organisational behaviour is the: "study of human behavior in organizational settings, the interface between human behavior and the organization, and the organization itself". OB research can be categorized in at least three ways: individuals in organizations (micro-level) work groups (meso-level)
