Pharmacological Methods In Phytotherapy Research Evaluation Of Plant Materials

Laboratory protocols for pharmacological investigation of plant material.

Pharmacological Methods in Phytotherapy Research, Vol. 1: Selection, Preparation, and Pharmaceutical Evaluation of Plant Materials provides invaluable reference for anyone working with medicinal plants. Clear protocols detail methods for selection and extraction of plant material, as well as pharmacological investigation and presentation of results.

It remains to be seen if the observed pharmacological effects are attributable to the presence of any specific phytochemicals, although it is worth mentioning that some previously isolated compounds in *T. crispa* have demonstrated antinociceptive activity through interfering with the release of nitric oxide, prostaglandin E2, and tumor necrosis factor (TNF) α (Choi et al., 2004; Yuanyuan, Yuan, & Hongquan, 2010). This warrants further detailed investigation.
