Organized topically to realistically present the three overarching perspectives that guide today's researchers and practitioners of developmental psychology, David Bjorklund and Carlos Hernández Blas's CHILD AND ADOLESCENT DEVELOPMENT: AN INTEGRATED APPROACH provides not only a truly ground-breaking integrated approach but also the most practical and up-to-date introduction to this vital subject. The authors emphasize applied issues and consistently show how the major perspectives on human development must be integrated -rather than presented as contrasting and sometimes contradictory ways of looking at development-in order to meaningfully understand infants, children, and adolescents as well as how they develop. High-interest boxes including the Biopsychology of Childhood, Evolution in Action, and Socioculturally Speaking appear in rotation throughout the chapters to add both depth and dimension to the presentation of the text's comprehensive core content and featured perspectives. A rich set of pedagogical resources in the text itself and throughout its dynamic suite of online and print supplements helps to ensure that this text engages, enlightens, and challenges students in unique ways. Take a look and see why pre-publication reviewers and class-testers have been raving about the exciting teaching and learning possibilities this new text offers.
