In other words say the Outlaw 755 amp says its rated at 200 watts per channel, is that RMS or peak? Actually just found my answer. It seems they are rated using RMS. So that means this Peavey M-2600 amp probably is not going to output much into 8 Ohm speakers if it's only rated 130 watts into 4 Ohms. Thanks

With the increasing worldwide trend in population migration into urban centers, we are beginning to see the emergence of the kinds of mega-cities which were once the stuff of science fiction. It is clear to most urban planners and developers that accommodating the needs of the tens of millions of inhabitants of those megalopolises in an orderly and uninterrupted manner will require the seamless integration of and real-time monitoring and response services for public utilities and transportation systems. Part speculative look into the future of the world's urban centers, part technical blueprint, this visionary book helps lay the groundwork for the communication networks and services on which tomorrow's "smart cities" will run. Written by a uniquely well-qualified author team, this book provides detailed insights into the technical requirements for the wireless sensor and actuator networks required to make smart cities a reality.
