The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse. The author, himself a former member of Greenpeace, is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence. Using the best available statistical information from internationally recognised research institutes, Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world. His arguments are presented in non-technical, accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves. Concluding that there are more reasons for optimism than pessimism, Bjørn Lomborg stresses the need for clear-headed prioritisation of resources to tackle real, not imagined problems. The Skeptical Environmentalist offers readers a non-partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media.

Evocative and stimulating, engaging and timely, this small volume makes sense of the complicated and reciprocal relationship between law and culture. It starts with various definitions of law and the factors that anthropologists consider when they compare legal systems. Next, the experiences of exemplary researchers throughout history and some of the methods they used in their discoveries are discussed. Readers learn how to employ the comparative method and build a typology based on the source of a particular law by putting the world's legal system into one of three categories: Western law, religious law, and traditional law. The book also tackles important issues such as formal law versus informal law, using law to legitimize power, and clashing values within a single legal system. Examples from fieldwork experiences and historical events offer readers a chance to see how a method has been applied or a concept developed—as well as how law and culture are intertwined in the real world.
