A Guide to Internal Loss Prevention provides an analysis of loss prevention factors from the inside looking out, rather than the outside looking in, bringing to management's attention specific organizational areas that may be contributing to internal loss. It is the authors' intent to demonstrate that management personnel often do not pay attention to essential details, and that this laxity, carelessness, or deliberate negligence is costing both industry and the consuming public billions of dollars annually in needless added costs. This book is organized by recognizable business functions rather than by type of organization. Key topics discussed include the administrative, financial, management, production area, personnel, and safety considerations of loss prevention. White collar crime, computer security, and information security are also covered. Where possible, case studies are supplied to clearly depict an actual loss situation, so that management sees how it can happen. An attempt is made to identify loss-producing situations, their possible causes, their effects, and finally, recommendations for remedies that may enable management to prevent recurrences, thereby saving money and ultimately profits.

Conventional business wisdom tells us that entrepreneurs are society's main source of innovation. Young founders leave college with a big idea, get to work in a garage, and build something that changes the world. Typical corporate employees, strangled by slow-moving bureaucracy, are blocked from making transformative discoveries. In Driving Innovation from Within, strategist and advisor Kaihan Krippendorff disproves one of today's biggest business myths to highlight lessons for innovators and leaders. He reveals how many of the modern world's most impactful creations were invented by passionate employee innovators. If it were left up to go-it-alone entrepreneurs, we would not have mobile phones, personal computers, or e-mail. Distilling more than 150 interviews with internal innovators and leading experts along with insights from the latest research and today's most successful companies, from Tencent and Amazon to Mastercard and Starbucks, Krippendorff lays out a step-by-step playbook to unlock innovation from the inside. He maps the barriers that frustrate efforts to disrupt from within and provides tools to remove them, detailing how visionary leaders can create islands of freedom inside an organization to activate existing employees' potential and beat startups at their own game. Driving Innovation from Within is a practical and inspiring guide to leadership from all levels for those who want the fulfillment of changing the world without leaving their job in order to do it.
