*Elsevier*

Production is a process to make a product using four factors of production. Land, Labor, Capital and entrepreneur. Production is the process which change one object into another.

consumption is the use of products, usually measured as purchase of end of the production line goods and services. 747 views.

*What is the difference  
between production and  
consumption ...*

Consumption and household production. Aggregate consumption is a component of aggregate demand.

# Get Free The Production And Consumption Of Music

Consumption is defined in part by comparison to production. In the tradition of the Columbia School of Household Economics, also known as the New Home Economics, commercial consumption has to be analyzed in the context of household production. The opportunity cost of time affects the cost of home-produced substitutes and therefore demand for commercial goods and services.
