Value investing uses a balanced approach to analysis so that there is no a priori primacy given to any one factor in an appraisal. In accounting terms, value investing treats every accounting number as being as important as any other number, with each number being derived from, a function of, and modified by all other accounting numbers.

1. Valuation is more than projecting earnings or cash flows a few years forward. Many companies are valuable because of the assets they hold. A serious value investor should attempt to understand the marketability of those assets irrespective of the price at which they are recorded on the balance sheet.
