we are our brains | Book Library

Swaab describes how our brains work from their very beginnings in the womb and on through old age and dementia to death and even beyond. He explains how gender differences develop in the embryonic brain, what goes on in the heads of adolescents, and criminals, how moral behaviour develops, how our memories work and how our brains influence our choice of partner. Swaab is not writing to reassure us. In every phase of life much can go wrong.

Book - We Are Our Brains - Letterenfonds

We are our mind and body, integrated together, in relation to our environment. Our brains are the biological information processing substrate on top of which our introspecting mind exists. The mind is brought to life by the brain. If we give general anesthesia to the brain, the mind turns off.
